

HAPPY 10TH BIRTHDAY TO BOREK! THANKS TO YOU!

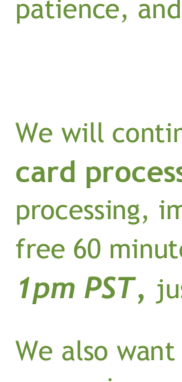

If you purchased one share of *Coca-Cola* in 1919, do you know how much it would be worth? Well, by the year 2000 it would have split into 4608 shares and that original \$40 investment (if you kept reinvesting dividends) would be worth **\$7 million!** To further this astonishing number, if your great-great grandparents had purchased just one of Asa Candler’s original shares in 1892 that \$100 investment would be worth **\$7.34 billion**—Wow!

Now, I’m not saying that I think Borek is headed for numbers like Coca-Cola, but I am saying that we cherish each one of our customer’s businesses’, the relationship we build with you through the years, and the stock we have in your company. We know that working with you to continue to automate your processes and grow your business, will pay off! But sometimes we have to go through lulls in the market, and pains in growing, to get to the beautiful green field – holding our own bottle of Coca-Cola, and singing **“I’d like to teach the world to sing”**. Okay, I’m off on a bit of a tangent, but it was a great commercial and song—check out the [link!](#)

We look forward to many more years of service to you – and we hope we continue to inspire you; enlighten you with knowledge of how to expand the use of your investment; & help you make processes easier, so you can listen to music – and enjoy your business even more!

Borek Business Solutions Annual Green Report

Last year at this time we shared some of the ways *Borek and Microsoft* were helping to lessen our impact on the environment. At Microsoft Convergence we were provided with refillable water bottles and this year we even used eating utensils and plates **made from corn husks** (see the link for a company who creates compostable supplies)!

This month marks Borek’s tenth year in providing Dynamics GP customers with service, support, training, and consulting expertise for their ERP systems. We look forward to the next ten years and hope that we DON’T leave our mark on the environment – but instead leave a **beauty mark** on your business by helping to improve your processes, save you from any unnecessary gray hairs, and automate procedures that help you save our beautiful earth by providing information electronically through the internet, emails, portals, and easy inquires instead of using our valuable resources like paper, patience, and people’s man hours!

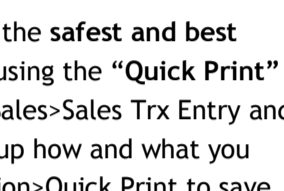

NODUS Technologies, Inc.

We will continue to share our partners solutions - like **Nodus Technologies’ credit card processing and on-line bill pay modules** - which simplify your credit card processing, improve your cash flow, and reduce paperwork! If you want to attend a free 60 minute webinar we are co-sponsoring with them on **Tuesday, June 2nd at 1pm PST**, just [click here to register!](#)

We also want to share some of the individual steps we at Borek are taking to protect our environment – we hope they inspire you and give you some ideas to try.

Composting – Now, with indoor Auto-composters (available at Costco), we can have the composter under our sink or in the garage and not have to fuss with stirring and sifting –Just plug it in and fill! But there are also great outdoor composters that allow for larger portions and a more ‘hands-on’ experience.

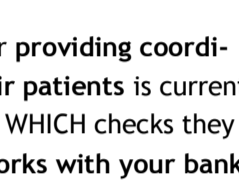

Recycling – Not just at home – but at work too! Paper, Glass, Plastic, Styrofoam! Make sure your business has the appropriate bins designated.

Re-use – Don’t just buy another case of water bottles! Buy a big jug and refill your personal water bottle. Or, put a filter on taps (again, at home AND work)!

Cloth Shopping Bags – Keep some big cloth shopping bags in your car so you can save on the use of plastic bags when making purchases!

Energy Efficient Light Bulbs – Compact Fluorescent Light Bulbs use 66 less energy and last 10 times longer. If every household in the United States replaced just one incandescent light bulb with a CFL bulb, it would be equivalent to removing one million cars from the road, according to Energy Star.

Central Oregon Borek Customers Share Tricks!

We thought it was time for our customers to share between each other! Each of the next several Borek Newsletters will focus on a group of you!

This month we’ve highlighted a few of our customers in the Central Oregon region – and revealed a trick, tip, achievement, or module they have ‘picked up’ lately!

Metolious Mountain Products – Designers/builders of the **safest and best climbing gear for rock climbing** has recently started using the **“Quick Print” option in the SOP** entry screen! Go to Transactions>Sales>Sales Trx Entry and choose Options>Quick Print Setup on the toolbar. Setup how and what you would like to “Quick Print” and then hit Ctrl-Q or Option>Quick Print to save lots of keystrokes!

Rocky Mountain Product –National Award winners for **tantalizing Sauces and Seasonings** is now using the **“unapplied amount” in the Dynamics GP “Edit Checks” window** to select to prepay a vendor for orders that may not have invoices entered yet in the books. They used to use the manual checks process.

Clear Choice Health Plans –An innovative insurance company who offers **health insurance to individuals & business in Oregon, Idaho, and Montana** recently upgraded to GP 10.0 to take advantage of the **Excel Report Builder!** They are now designing some great excel HR reports for Benefits and employee info from tables that were tough for them to combine before.

Bend Memorial Clinic –A world-class medical care center **providing coordinated, comprehensive, and compassionate care to their patients** is currently implementing Positive Pay to make sure the bank knows WHICH checks they should cash! The GP module is called **“Safe Pay” and works with your banks requirements to confirm the authenticity of a check before paying it.**

Fuqua Homes –A northwest builder of **quality manufactured homes** for over 40 years recently discovered the **“Default” button in the distribution window for AP transactions!** Specifically useful when an invoice is entered, then a CCD payment is made prior to posting – hitting the default button fixes up the distributions up so you don’t get an error when trying to post.

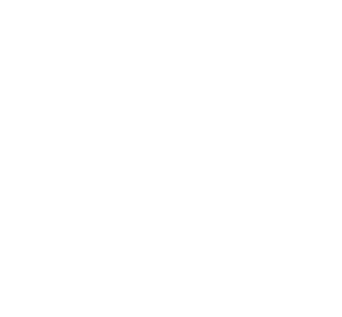

Bird Gard, LLC. –A manufacturer of **electronic bird control products designed to repel birds from crops, buildings, and airports.** Sold around the world, from across Asia to Australia, and even to our neighborhood airport. Bird Gard used the information in one of our “Borek’s Tips” emails to make sure their **nightly backups were backing up the right data and taken OFFSITE** nightly!

We will continue to spotlight our customers and share some of the recent tips they’ve discovered with our entire customer base. If you want to share a trick you’ve learned – or want to comment on any of the ones above – just [click here!](#)

Microsoft GP:Latest Service Packs/Revisions (click on links to go to individual product download pages) **Please contact us for notes prior to installing.**
